

Bringing Golfers Together

SMARTargets - Junior Competition, Camps, After School

Kids love to shoot at targets. Especially SMARTargets* that light up when hit and can keep score. Place targets at your chosen locations. Run team or individual competitions, use for demonstration / training, or just for fun! Provides a focus making camp management easier.

When a young golfer hits a SMARTarget and it lights up, they love it. Especially when their friends and spectators see. Every golfer wants that.

Each target requires a specific golf skill. Distance control, height or speed control. Offers a real golf experience.

Set up for individual or team competition. Great for spectators too. Precisely time your event. Or just whack balls for fun and celebrate a hit!
